## **Temporary Flood Protection Structures**

Due to the increased risk of flooding this winter, the City of Kent has recently adopted an ordinance waiving permits for temporary flood protection measures of critical facilities. All flood control measures must be removed by July 1, 2010 unless permanent permit approval is completed. For a copy of the ordinance, please visit www.choosekent.com/permitcenter or call (253) 856-5500.

We are requesting that businesses take a moment to fill out this simple form notifying us of the flood protection structures they have installed. This form can be mailed or delivered to the address above, or faxed to (253) 856-5600.

Location:												
Type of Critical Facility Being Protected:												
Parcel Number (s):	Acres:											
Building Owner	Contact Person											
Name	Name											
Address	Address											
City Zip												
Phone	Phone											
E-mail	E-mail											
Temporary Flood Protection Devices Used:												
Regular sandbags	• Please provide a simple											
Large bulk bags ("super sacks")	sketch of your property											
Aqua bladders	on the back of this form,											
Concrete wall	<ul><li>showing the footprint of</li><li>your building in relation</li></ul>											
Ecology blocks	to the temporary flood											
Hesco containers	protection devices used.											
Earthen berm												
Other:												

Property owners are still required to prevent pollution during flood preparation activities. For more information, please call Environmental Engineering staff at (253) 856-5500.
